ABOUT ME

Computer Science undergraduate at Bina Nusantara University specializing in AI/Machine Learning, with practical experience in computer vision, natural language processing, and speech processing. Also experienced in full-stack development, from building backend services to deploying models as web applications. Seeking an internship as an AI/ML Engineer or Software Engineering internship.

EDUCATION

Binus University - Bachelor of Computer Science **Sep 2024 - Feb 2028 (Expected)**

- GPA : 3.71/4.00
- Relevant Courses: Artificial Intelligence, Software Engineering, Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, Speech Recognation, Embedded Systems, Algorithm Analysis.

PROJECTS

SentimenID | *Python, Scikit-learn, Streamlit* | *Team of 3* **Mar 2026 - Jun 2026**

A web app that detects hate speech and abusive language in Indonesian tweets

- Led a team of 3 to build an end-to-end ML pipeline, from preprocessing to a Streamlit app for tweet classification
- Build and compared KNN, Logistic Regression, Naive Bayes, and Random Forest with Count and TF-IDF, reaching 76.4% F1-score

VidNote | *Python, FastAPI, Whisper, Ollama, FFmpeg* | *Team of 2* **Aug 2026 - Oct 2026**

A local app that turns videos into speaker-colored hardsubs, transcripts, and summaries

- Built the FastAPI backend for a 7-stage pipeline that processes a 4.5-minute video in 2.1 minutes on GPU
- Implemented Whisper transcription with VAD and hallucination filtering, plus GPU-to-CPU fallback for 6 GB VRAM

Pinjemin | *Node.js, Express.js, PostgreSQL* | *Team of 5* **Feb 2026 - May 2026**

A peer-to-peer platform for neighbors to lend and borrow items

- Led a team of 5 to build a lending platform covering listing, request, owner approval, and return flow
- Built nearest-item search with the Haversine formula, a Leaflet.js location map, and JWT-secured APIs with a trust-score review system

Tutorin | *React, Express.js, Vite, Tailwind CSS, MySQL* | *Team of 2* **Dec 2025 - Mar 2026**

A peer tutoring platform connecting students with mentors for 1-on-1 online sessions

- Built 10+ React pages with protected routes for separate mentee and mentor dashboards
- Designed the MySQL schema with seed data for mentors, subjects, slots, and reviews

TrashClassifier | *Python, Scikit-learn, OpenCV, Streamlit* | *Team of 5* **Apr 2026 - Jun 2026**

A web app that classifies waste photos into paper, glass, and plastic

- Co-built an SVM waste image classifier with 89.5% accuracy on 237 held-out images
- Tuned the model with grouped 5-fold cross-validation

ORGANIZATIONS EXPERIENCE

Bina Nusantara Computer Club (BNCC) - Member **Sep 2025 - Present**

- Completed a weekly Backend Programming course and attended 5+ workshops on AI/Machine Learning, Data Science, and Deep Learning.

SKILLS

- **Programming Languages** : Python, JavaScript, C
- **AI / Machine Learning** : Numpy, Pandas, PyTorch, Scikit-learn
- **Web Development** : React, Tailwind CSS, HTML, CSS
- **Backend Development** : Node.js, Express.js, FastAPI
- **Database** : MySQL
- **Tools & Technologies** : Github, Vscode, Google Colab
- **Spoken Languages** : Indonesian (Native), English (Professional Working Proficiency)
