ABOUT ME

Computer Science undergraduate at Bina Nusantara University specializing in AI/Machine Learning, with practical experience in computer vision, natural language processing, and speech processing. Also experienced in full-stack development, from building backend services to deploying models as web applications. Seeking an internship as an AI/ML Engineer or Software Engineering internship.

EDUCATION

Binus University - Bachelor of Computer Science **Sep 2024 - Feb 2028 (Expected)**

- GPA : 3.71/4.00
- Relevant Courses: Artificial Intelligence, Software Engineering, Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, Speech Recognation, Embedded Systems, Algorithm Analysis.

PROJECTS

SentimenID | *Python, Scikit-learn* | *Team of 3* **Mar 2026 - Jun 2026**

A web app that detects hate speech and abusive language in Indonesian tweets

- Led a team of 3 to build an end-to-end ML pipeline, from preprocessing to a Streamlit app for tweet classification
- Build and compared KNN, Logistic Regression, Naive Bayes, and Random Forest with Count and TF-IDF, reaching 76.4% F1-score

VidNote | *Python, FastAPI, Whisper* | *Team of 3* **Aug 2026 - Oct 2026**

A local app that turns videos into speaker-colored hardsubs, transcripts, and summaries

- Built the FastAPI backend that connects the transcription, speaker separation, subtitle, and summary stages
- Implemented Whisper transcription with voice activity detection (VAD) to filter out silence and noise

Pinjemin | *Node.js, Express.js, HTML, CSS, JavaScript* | *Team of 5* **Feb 2026 - May 2026**

A peer-to-peer platform for neighbors to lend and borrow items

- Led a team of 5 to build a lending platform, developing the REST APIs for the borrow request, owner approval, and item return flow
- Built the frontend with HTML, CSS, and JavaScript, including an interactive Leaflet.js location map.

Tutorin | *Express.js, MySQL* | *Team of 3* **Dec 2025 - Mar 2026**

A peer tutoring platform connecting students with mentors for 1-on-1 online sessions

- Designed the MySQL schema with seed data for mentors, subjects, slots, and reviews
- Built the mentor flow covering profile onboarding, availability slot management, session completion, and wallet earnings with withdrawals

TrashClassifier | *Python, Scikit-learn, OpenCV* | *Team of 5* **Apr 2026 - Jun 2026**

A web app that classifies waste photos into paper, glass, and plastic

- Co-built an SVM waste image classifier with 89.5% accuracy on 237 held-out images
- Tuned the model with grouped 5-fold cross-validation

SKILLS

Technical Skills

- Programming Languages : Python, JavaScript, Java, C
- AI / Machine Learning : Numpy, Pandas, Scikit-learn, PyTorch(Basic)
- Web Development : HTML, CSS, JavaScript
- Backend Development : Node.js, Express.js, FastAPI
- Database : MySQL
- Tools & Technologies : Github, Vscode, Google Colab

Soft Skills

- Teamwork & Collaboration : Works effectively with teammates to coordinate tasks and deliver shared project goals
- Problem Solving : Analytical approach to debugging and designing solutions
- Adaptability & Fast Learning : Quickly picks up new tools and frameworks

Spoken Languages : Indonesian (Native), English (Professional Working Proficiency)
