## ABOUT ME

Computer Science undergraduate at Bina Nusantara University specializing in AI/Machine Learning, with practical project experience in computer vision and natural language processing. Also experienced in full-stack development, including building backend services and web applications. Seeking an internship as an AI/ML Engineer or Software Engineer.

## EDUCATION

**Binus University** - Bachelor of Computer Science **Sep 2024 - Feb 2028 (Expected)**

- GPA : 3.71/4.00
- Relevant Courses: Artificial Intelligence, Software Engineering, Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, Algorithm and Programming

## PROJECTS

**SentimenID** | *Python, Scikit-learn* | *Team of 3* **Mar 2026 - Jun 2026**

A web app that detects hate speech and abusive language in Indonesian tweets

- Led development of a tweet sentiment classifier, from data preprocessing to final evaluation
- Built and compared KNN, Logistic Regression, Naive Bayes, and Random Forest using Count and TF-IDF features, achieving a 76.4% F1-score

**TrashClassifier** | *Python, Scikit-learn, OpenCV* | *Team of 5* **Apr 2026 - Jun 2026**

A web app that classifies waste photos into paper, glass, and plastic

- Built a feature extraction pipeline (1,734 features: color, texture, shape) to classify paper, glass, and plastic waste
- Added image augmentation (6 variants per photo) with OpenCV and sped up processing using parallel computing

**Pinjemin** | *Node.js, Express.js, HTML, CSS, JavaScript* | *Team of 5* **Feb 2026 - May 2026**

A peer-to-peer platform for neighbors to lend and borrow items

- Led development of a peer-to-peer lending platform, building REST APIs (Node.js, Express) for the borrow request, owner approval, and item return flow
- Built the frontend with HTML, CSS, and JavaScript, including an interactive Leaflet.js location map.

**EUR/USD Close Price Prediction** | *Python, NumPy, Scikit-learn* | *Team of 5* **Apr 2026 - Jun 2026**

A web app that predicts the next 15-minute Close price of EUR/USD

- Built a linear regression model (NumPy, gradient descent) and a naive baseline to forecast next-candle price on 100K rows of OHLC data
- Evaluated both using RMSE, MAE, $R^2$, and MAPE on a chronological train/test split

**Tutorin** | *MySQL* | *Team of 5* **Dec 2025 - Mar 2026**

A peer tutoring platform connecting students with mentors for 1-on-1 online sessions

- Designed a normalized relational MySQL schema (15 tables, 21 foreign keys, 13 indexes) covering users, mentors, bookings, payments, reviews, and wallets

## SKILLS

**Technical Skills**

- Programming Languages : Python, JavaScript, C
- AI / Machine Learning : Numpy, Pandas, Scikit-learn
- Web Development : HTML, CSS, JavaScript
- Backend Development : Node.js, Express.js
- Database : MySQL
- Tools & Technologies : Github, Vscode, Google Colab

**Soft Skills**

- Teamwork & Collaboration : Works effectively with teammates to coordinate tasks and deliver shared project goals
- Problem Solving : Analytical approach to debugging and designing solutions
- Adaptability & Fast Learning : Quickly picks up new tools and frameworks

**Spoken Languages** : Indonesian (Native), English (Professional Working Proficiency)
